

Why Choose SOUNDEX®?

SOUNDEX®, internationally unparalleled temporary noise control products of the greatest integrity which continuously exceed our customers expectations

Fire Resistant

SOUNDEX® products are made entirely from fire resistant materials and we are the only manufacture to have developed an acoustic curtain with Class 0 fire resistance.

Weather Resistant

The SOUNDEX® range incorporates water resistant technologies of the highest integrity ensuring that they don't gain any excess weight as a result of water ingress.

High Attenuation

Independently tested and certified to BS EN Standards SOUNDEX has developed The highest attenuating temporary noise control products available.

Easy to Assemble

Our patented design incorporates an ingenious Velcro connection which enables the construction of a virtually unbroken noise barrier with the greatest possible ease.

Non-Irritant

The SOUNDEX® range of product utilises non-irritant materials making them safe to handle without the need for protective clothing and eliminating potential issues with the public.

Global Distribution

The internationally unparalleled SOUNDEX® temporary noise control products are available wherever they are required globally via our extensive distributor network

SOUNDEX® Contractor Series

No nonsense high quality fire and weather resistant temporary acoustic products predominately for the construction & civil engineering industries.

This range currently consists of two products, a curtain and a quilt which are used extensively in a wide variety of internal and external situations.

C1/1 - SOUNDEX®
Contractor Acoustic Curtain

This lightweight acoustic curtain is excellent for general noise control tested to BS EN standards with a maximum attenuation of 28.2dB.

Q1/1 - SOUNDEX®
Contractor Acoustic Quilt

Specifically designed to cover an entire 3.6m fence panel in one go this is a very popular option with all the normal SOUNDEX® benefits.

Customer Testimonial

Brighton Railway Station Thank you for supplying us with your SOUNDEX® acoustic enclosure, we have been using it constantly for two months in the main station concourse area. The main station has an enclosed roof which when we started breaking the existing floor we were told to stop because of safety issues, the station staff could not hear if there were any evacuation announcements. Once we installed your SOUNDEX® E4/2 acoustic enclosure the decibels were reduced dramatically. We monitored the announcements and they were able to hear fine and speaking to the guys on site they were happy to work within the acoustic enclosure. The next phase of our works will be continuing in the same way so we will be using the enclosure again.

Performance Series

Our core range of market leading products including the popular C1/2 acoustic curtain. An essential series when working in noise sensitive areas.

This range consists of eight products comprising of a choice of three curtains, one quilt and four enclosures. All products carry our signature fire and weather resistance with the acoustic performance that exceeds most other variants. A range that started the history of the SOUNDEX®.

C1/2 - SOUNDEX®
Performance Acoustic Curtain

This product has become the preferred choice for many contractors. Its exceptional acoustic performance exceeds most other variants available.

C2/2 - SOUNDEX®
Performance Acoustic Curtain

The same high performance as the C1/2 but with the additional benefit of being manufactured to suit temporary fence panel extensions up to 2.5m high.

C3/2 - SOUNDEX®
Performance Acoustic Curtain

This light weight high performance acoustic barrier incorporates our H²O-Tech® waterproofing technology for environments of extreme humidity.

Q1/2 - SOUNDEX®
Performance Acoustic Quilt

This quilt is an excellent addition to the performance range which is manufactured with a new generation acoustic core that is light weight with excellent attenuation and full fire and water resistance.

E1/2 - SOUNDEX®
Performance Micro Barrier

An excellent concept that is extremely quick and easy to use and a favourite of maintenance, utilities and civil engineering companies.

E2/2 - SOUNDEX®
Quick-Tech® Multi Enclosure

A very versatile product that can be utilised for a wide variety of applications by forming it into a small enclosures or as a continuous low level barrier.

E3/2 - SOUNDEX®
Quick-Tech® Standard Enclosure

A robust 2.5m² industrial quality enclosure incorporating acoustic walls and roof. Excellent for retaining noise break-out to a very small area.

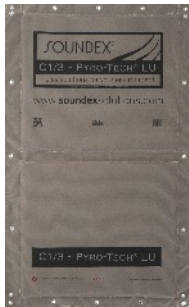

E4/2 - SOUNDEX®
Quick-Tech® Maintenance Enclosure

A 1.9 x 3.5m enclosure suitable for shopping aisles and other restricted spaces to enable maintenance works with minimum disruption.

SOUNDEX® Professional Series

These products are the pinnacle of performance and quality which are manufactured in conformance to BS & EN accreditations for specialist applications.

This range consists of four specialist products comprising of a choice of two curtains, one enclosure and one attenuator utilising cutting-edge technology to ensure ultra-high performance for use in critical and extremely noise sensitive environments.

C1/3 - SOUNDEX®
Pyro-Tech® Acoustic Curtain

A unique product that was developed in conjunction with the London Underground to the extremely stringent BS 6853:1999 fire standard.

C2/3 - SOUNDEX®
Professional Acoustic Curtain

The best temporary acoustic curtain currently available that is recommended for use in the most extreme of noise sensitive environments.

E2/3 - SOUNDEX®
PLF-Tech® Machinery Enclosure

Designed to attenuate continuously running small generators or compressors this product is a must for night works or in very noise sensitive areas.

A2/3 - SOUNDEX®
PLF-Tech® Exhaust Attenuator

A very high quality super performance unit that is a quick resilient solution to the noise issue created by exhausts on large generators.
