# Portable Dust Containment Enclosure

## Product Details

The Dust Containment enclosure is lightweight and can be mobile if required. Taking less than 5 minutes to install, it is flexible and convenient for on-site requirements and fits on to a pallet for ease of transportation to and from site.

A patented quick to erect system enabling a standard enclosure size of 2.52m or customise size available.

## Key Applications

- ✓ Replacement of floor tiles in large internal areas i.e.; shopping malls, stations and airports
- ✓ Dust containment during localised cement mixing operations
- ✓ Heat traps for localised heating

### Flame Resistant

Independently tested to ensure your workers are safe on site

### Robust & Lightweight

Industrial quality lightweight frame for durability

### Customised Size & Branding

We can customise the enclosure size based on your needs  
Your company logo can also be printed

### Multipurpose & Relocatable

Ideal for containing dust or for trapping localised heating
